

UHMW continuous fenders

Are the perfect impact and wear solution
Will not crack, chip, peel or delaminate
Are environmentally friendly and UV stable
Custom colors available that never require painting
Resist barnacle attachment and are impervious to marine borers
Pile wraps are available with a 5" to 12" radius

UHMW marine fender pads

Are six times more abrasion resistant than steel
Are virtually unbreakable
Are non-marking and non-abrasive
Require little to no maintenance
Can be custom fabricated to include counter bores, beveled and chamfered edges

Common applications for UHMW fenders

Fitted pile wraps
Heat formed / cold bent fenders

Rub rails
Fender pads
Bumpers

Continuous shapes
Rubber or fiberglass backed
Tapered fenders
