

We provide specially formulated HDPE that withstands the rigors of harsh outdoor marine environments. It is UV-stabilized to resist damage and retain its beauty, even after years of direct sunlight. Increasingly, these products replace wood and laminates in boating applications. It does not splinter, crack, delaminate, rot, swell, or absorb water like traditional materials. Even under heavy foot traffic on yacht decks, it remains virtually maintenance-free. In addition, there is no need to stain or paint every few years. The color is integrated with the polymer and retains its vibrant appearance better than painted wood.

Features

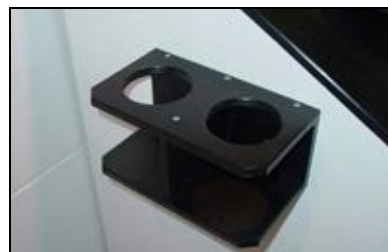

- UV stabilized to withstand harsh marine environments
- Does not splinter, crack or delaminate, rot, swell or absorb water
- Stain resistant and never needs painting
- Machinable with standard wood working tools
- Easily formable for curves and bends

Applications

- Cabinets and counter tops
- Doors and windows
- Swimming pool equipment
- Swim platforms
- Trim and molding
- Steps and ladder treads
- Bait and gutting trays
- Hatch covers
- Cup and fishing pole holders
- Accessories
