

Capabilities

- Sheet from 0.25" to 7" thick in sizes from 2' x 4' to 4' x 10'
- Rod from 2" to 36" diameter in select lengths from 12" to 48"
- Disk from 8" to 68" in various thicknesses
- Tubular bar from 1.25" to 40" OD in select lengths from 13" to 50"
- Fabrication services including CNC milling, routing, turning and machined parts assembly

Material properties

- High tensile and compressive strength
- Excellent abrasion and wear resistance grades
- High impact resistance grades
- Low coefficient of friction grades
- Low moisture absorption grades
- Heat stabilized grades with continuous operating temperatures of 275° F
- FDA approved grades for food processing applications

Free local deliveries • Custom fabrication • Outstanding customer service
